## Education and Training

I have always been very interested in literature, the study of religion, and computer programming. I gained my first “programming” experience around 1977, at the age of six, sitting on my father’s lap.

|           |                                                                                  |
|-----------|----------------------------------------------------------------------------------|
| 2010      | “Train the Trainer” seminar at SPC Consulting GmbH                               |
| 2009      | NLP Practitioner training at the Austrian Training Centre for NLP, Peter Schütz  |
| 2008      | Certified ScrumMaster training with “Sprint It - Boris Gloger”                   |
| 2006      | Mediation training at “Invidivuelle Kommunikation - Beate Danczul”               |
| 1998      | Masters degree completed with a thesis on Gustav Meyrink and occult literature   |
| 1991-1998 | Studies in German and Jewish Studies at the University of Vienna                 |
| 1990-1991 | Bookseller apprenticeship                                                        |
| 1990      | Austrian school-leaving certificate (Matura), passed with distinction            |
| 1978-1990 | Primary and secondary education at Institut Neulandschulen, Vienna 10th district |

## Personal Projects

My private “weekend projects” primarily serve my technical development and personal enjoyment, and often contain experimental, innovative code at the pre-alpha stage.

|                     |                                                                                                          |
|---------------------|----------------------------------------------------------------------------------------------------------|
| <b>Notes</b>        | My personal notes application, consisting of PHP scripts, extended Markdown, Makefiles and Vim functions |
| <b>TypicalLisp</b>  | Strict, statically typed Lisp dialect<br>Written in C                                                    |
| <b>SteerGlance</b>  | MVC, ORM and web front-end framework<br>Written in Node.js and JavaScript                                |
| <b>SimpleBonsai</b> | Private website for managing hierarchical bookmark tags<br>Written in PHP                                |
| <b>CGenerics</b>    | Generic “OOP” library in pure C using preprocessor directives                                            |
| <b>BabelBarbe</b>   | Nondeterministic top-down parser framework<br>Written in pure C using CGenerics and limited “OOP”        |
| <b>Forklift</b>     | A FORTH variant written in pure x86-64 assembly                                                          |
